

MIGRATION

CONTINUITY

RECOVERY

OPTIMIZATION

With local and remote solutions, FalconStor technology ensures your data is continuously available when and where you need it.

99.99%
DATA AVAILABILITY

CHALLENGES

- Data must be readily available and always accessible
- Need quick and easy recovery in case of total failure
- Need a recovery process that accommodates services, storage, and applications in different buildings
- Traditional backup and recovery solutions do not meet data availability requirements
- Leverage Flash and SSD benefits at the best price point
- Ability to cross communicate between platforms and storage

BENEFITS

- Continuously available, always-on access to data
- No loss to productivity from storage or network failure
- Email, websites, and CRM applications will not go down
- No data loss when a building is lost in a datacenter
- A recovery process that brings back everything with one click
- 99.99% data availability
- Restoring systems in a matter of minutes
- Stretch cluster capabilities
- IO cluster speed supports any disk from modern to legacy

THE POWER TO #BEFREE

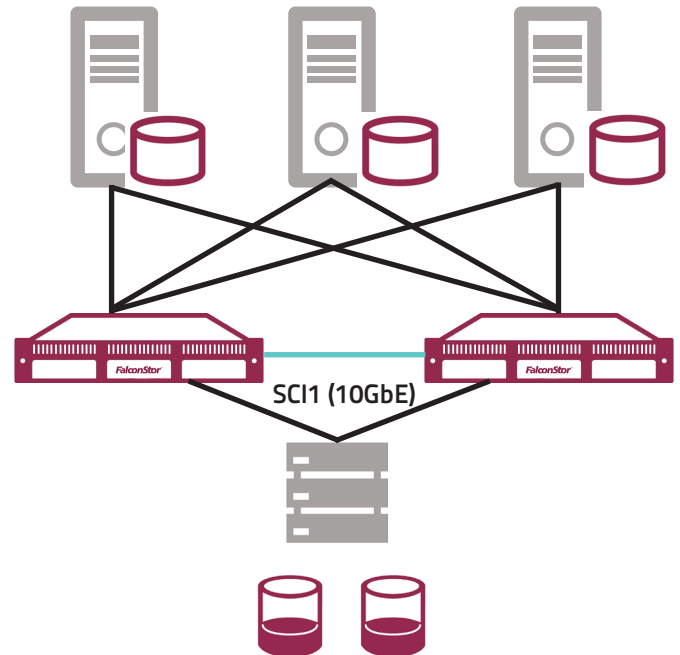

FalconStor.com

FalconStor Business Continuity solutions eliminate the risk of downtime of critical services, applications, and sites.

Data Center Availability of Critical Business Data

Every organization has a mission-critical application, the one that if it becomes unresponsive or goes down can have catastrophic implications to the business operations or revenue. To properly protect the business from this level of failure, IT departments look for a product or solution that provides them with the flexibility required to meet the needs of the business. FalconStor technology is unique as it protects local resources such as email, web services, and databases from going down in the event of hardware or networking failure. FalconStor Business Continuity solutions provide IT departments with the freedom and flexibility to move services, applications, or virtual machines quickly between floors, between storage platforms including Flash and SSD, or between servers the minute connectivity is interrupted.

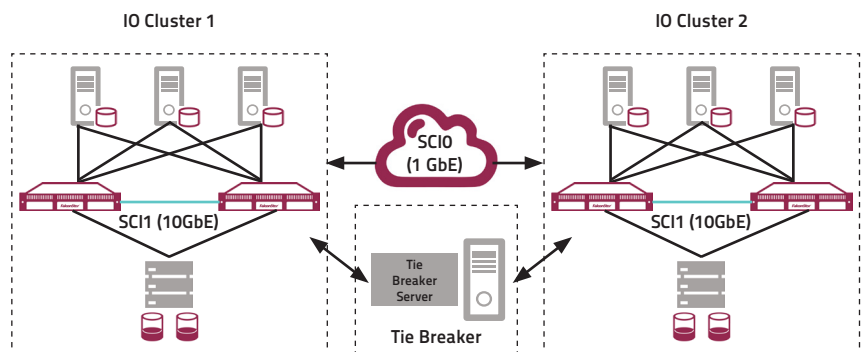

IO Cluster

Site-to-Site Availability of Business Data

Disasters are no longer just natural weather events that are isolated to specific parts of the world or occurring at certain times of the year. A disaster can be caused by simply opening an infected email, unplugging the wrong server, or using the wrong backup. This can affect a whole office floor or the entire company. In order to protect the business from these unforeseen risks, IT organizations need a solution that is aware of its surroundings and can instantly respond in the event that disaster strikes. The FalconStor Business Continuity solution is not limited to providing high availability to resources in the local data center, it can give organizations the freedom to move business operations between buildings separated by several blocks or a small town.

IO Multi-Cluster - "4-Way"

FalconStor Business Continuity solutions are available in multiple formats to suit virtually every type of environment.

HOW WE DELIVER

Software Only

Provides the flexibility to choose the hardware and configuration appropriate for the level of continuity required

Virtual Appliance

Ideal for small environments and remote or branch offices and suitable for virtual or physical settings

Storage Appliance

All-in-one appliance provides continuity and removes the risk of downtime of critical services, applications, and sites

Gateway

For larger organizations looking to put existing storage to better use, gateway deployments provide consistent capabilities across multiple types of storage

SUCCESS SPEAKS FOR ITSELF

“With FalconStor NSS, we are prepared for the worst. I sleep more easily at night knowing that we can get our services back quickly. If a disaster strikes and the system is put into use, the project pays for itself instantly.”
 — David Munn, Greater London Authority

“FalconStor NSS enables us to virtualize and protect our data, while FalconStor VTL improves our backup speeds. Together, these products form a comprehensive solution to provide continuous data availability for the institute, and high service levels for our staff and patients alike.”
 — Teoh Teong Chooi, Institut Jantung Negara

“We are very pleased with the way FalconStor NSS allows us to use hardware from a variety of vendors. By using the hardware of our choice, we can ensure the best mix of performance, cutting-edge technology, and cost efficiency across the region.”
 — Petr Pavlinec, Vysocina Region
